Objective

Results-driven, computer engineering professional and collaborative team player with hands-on experience building and deploying full-stack systems, embedded integrations, and machine learning pipelines. Seeking to play a direct role in the sustainment and success of an innovative team where I can contribute across the full development lifecycle, from architecture and implementation to testing and optimization, while growing alongside a collaborative and driven group.

Summary

4 Constants Brought to any Team or Organization:

- **Analytical Problem-Solving:** Data-driven thinker who debugs hardware and software challenges to reach solutions fast.
- **Relationship Management:** Leads diverse teams across firmware, software, and systems to stay aligned and deliver on time.
- **Operational Discipline:** Brings structure to complex schedules and multi-system environments from day one.
- **Technical Versatility:** Fluent across the full stack, from embedded systems to cloud applications and ML pipelines.

Education & Projects

TEXAS A&M UNIVERSITY – 3.13 GPA

College Station, TX – Aug 2022 – Graduated May 2026

- Bachelor's in Computer Engineering
- Minor in Mathematics

ECONEST – HOME AUTOMATION SYSTEM – CAPSTONE PROJECT

- Deployed a production AI-driven smart home unifying 84 IoT devices across Zigbee, Wi-Fi, and cloud APIs.
- Built an end-to-end pipeline from embedded hardware through Flask and MySQL to an AI layer for autonomous control.
- Delivered a live, AI-powered residential system to a supervising professor in a real-world environment.

DATABASE DASHBOARD - ADVENTUREWORKS DATABASE

- Built an interactive dashboard for exploring enterprise-scale employees, department, and sales data.
- Wrote complex SQL queries using joins, subqueries, and aggregation connected to a GUI via JDBC.
- Designed queries with performance and scalability in mind for large relational datasets.

TAMU TRANSIT VOICE – ACCESSIBLE BUS ASSISTANT

- Built a voice-first web prototype with AI-generated responses replacing the map-based TAMU bus app for low-vision students.
- Validated through a usability study where participants completed tasks faster than with the original app.
- Earned a 5/5 independent usability rating and 4.6/5 ease-of-use score in post-study surveys.

CUSTOM GOOGLE WORKSPACE API SIDEBAR TOOL

- Built a sidebar add-on consolidating document workflows via Google Drive and Gmail APIs.
- Implemented Find and Replace, digital signatures, and document duplication in a single interface.
- Designed a clean, modular UI built for usability and future expansion.

Certifications & Technical Skills

- **Certifications:** Building with the Claude API (Anthropic Academy), Microsoft Certified: Azure AI Fundamentals (AI:900)
- **Programming:** Python, C++, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks & Tools:** Flask, Next.js, Docker, MySQL, Git, Google Apps Script, PyTorch, JDBC
- **Cloud & Dev Environments:** Azure, Docker, Hugging Face, Tailscale, Home Assistant
- **Areas of Focus:** Full-Stack Development, Machine Learning, Database Design, Embedded Systems, IoT Integration

Work Experience

CAMP EAGLE – Group Camp Counselor

Rocksprings, TX - May 2023 – August 2025

- Demonstrated high-stakes leadership and operational discipline by supervising groups of 35+ individuals while strictly enforcing safety protocols and incident response procedures in a high-responsibility environment
- Fulfilled a contract during each summer from May-August

RAISING CANES – Trainer and Shift Manager

Frisco, TX – June 2021 – July 2022

- Directed weekly training and performance coaching for a 10-person team, ensuring consistent execution of standard work and high-quality production specifications

BRAUMS – Trainer and Crew Member

Frisco, TX – March 2018 – March 2021

- Onboarded and trained over 50 new employees in efficient operational workflows and quality standards to drive team performance and service excellence
